WARNING

Listening to audio on your headphones too loud for too long can damage your hearing.

Legislation of certain countries limits a maximum sound level of 86db to affect your hearing for 8 hours a day.

You are recommended to reduce the volume to a comfortable level when listening for prolonged periods of time.

Introduction

Thank you for choosing the Busbi BH200 wired gaming headphones with Virtual 7.1 surround sound. This guide will help you set up, customise, and maintain your Headphones for optimal performance.

Headphone Overview:

Controls:

Setup Instructions

Connect the Headphones

Plug the Headphones into a USB port on your computer.
Wait for your operating system to detect the Headphones.

Once installation is complete and a confirmation message appears, your Headphones are ready to use.

Driver Installation

To customise your Headphones settings, download the Busbi BH200 driver from the downloads section of the Busbi Support pages found at:
<https://busbistore.com/>

1. Visit the Busbi website: **<https://busbistore.com/>**
2. Locate your product in the support section.
3. Download the BH200 Gaming Headphones driver.
4. Once the download is complete, open the file.
5. Double-click the `.exe` file to start the installation.
6. Follow the on-screen instructions to finish the installation.
7. Launch the program to begin customising your Headphones.
